SUMMARY

Web developer and Technologist in Systems Analysis and Development (CEUB, Brazil). I build and maintain **8 production websites** written in HTML, CSS and JavaScript with no framework and no build step, **all scoring 100 for accessibility and best practices** on mobile Lighthouse. I automate in Python: I wrote **85 command-line tools** that have audited **1,442 websites**. I ship on Cloudflare Workers, Vercel and GitHub Pages, with CI/CD in GitHub Actions. **30 Google certifications** across cybersecurity, AI and cloud. Fully bilingual in English and Portuguese.

EXPERIENCE

Founder & Developer

Trevi Studios · Brasília, Brazil (remote)

- Built and maintain **8 production websites** (studio, e-commerce, restaurant, landscaping, spa, real estate, hair salon and pet shop) in plain HTML, CSS and JavaScript, with no framework and no build step.
- **100 for accessibility and best practices on mobile Lighthouse across all 8**, and **100 for SEO** on the indexable ones, with JSON-LD, sitemap, canonical tags and Search Console configured at launch.
- Wrote **85 command-line tools** in Python and Node that audit performance, accessibility and SEO in bulk and hunt console errors, broken links and horizontal scroll with Playwright: **1,442 websites analysed**.
- Hand-rolled **trilingual i18n** (EN/PT/ES) with browser language detection, persistence and translated accessibility attributes.
- Continuous deployment with **GitHub Actions**, Cloudflare Workers and Vercel, including DNS, HTTPS and security headers (CSP, HSTS).
- End-to-end delivery for paying clients: discovery, contract, development, domain, hosting and Google indexing.

Partner, Technical Lead

Clean-in · Florida, USA (remote)

- Rebuilt the company website off a paid platform onto static HTML on GitHub Pages, with HTTPS and a custom domain: **99 performance** and 100 for accessibility, best practices and SEO. Platform cost down to zero.
- Own the infrastructure, measurement and digital presence for the US market, in English.
